Board of Education Agenda Item

Item: H. ___________________________ Date: June 22, 2005

Topic: Final Review of the Computer/Technology Standards of Learning for Grades K-12

Presenter: Mr. Lan Neugent, Assistant Superintendent for Technology

Telephone Number: ___804-225-2757_______ E-Mail Address: Lan.Neugent@doe.virginia.gov

Origin:
___ Topic presented for information only (no board action required)
___ Board review required by
   ___ x__ State or federal law or regulation
   ____ Board of Education regulation
   ____ Other: ____________

x Action requested at this meeting ____________

___ Action requested at future meeting:
   Final adoption of the Computer/Technology Standards of Learning for Grades K-12.

Previous Review/Action:
___ No previous board review/action

_x__ Previous review/action

First Review of the Timeline for the Review and Approval of the Computer/Technology Standards of Learning for Grades K-12

date: September 22, 2004
action: The Board of Education accepted the timeline for the review process for the Computer/Technology Standards of Learning.

First Review of the Computer/Technology Standards of Learning for Grades K-12

date: March 25, 2005
action: The Board of Education approved the dissemination of the proposed Computer/Technology Standards of Learning and established a date for public hearings.

Public Hearing on Proposed Computer/Technology Standards of Learning for Grades K-12

date: May 25, 2005
action: The Board of Education conducted a public hearing on the proposed Computer/Technology Standards of Learning.
Background Information:
The Board of Education adopted a schedule for review and revisions to the Standards of Learning at its September 22, 2004, meeting. Accordingly, the Computer/Technology standards are scheduled for revision in 2005. (Code of Virginia § 22.1-253.13:1-2 By October 1, 2000, the Board of Education shall establish a regular schedule, in a manner it deems appropriate, for the review, and revision as may be necessary, of the Standards of Learning in all subject areas. Such review of each subject area shall occur at least once every seven years. Nothing in this section shall be construed to prohibit the Board from conducting such review and revision on a more frequent basis.) The Board of Education conducted a public hearing on the proposed Computer/Technology Standards on May 25, 2005.

Summary of Major Elements
A review of comments on the existing Computer/Technology Standards for Grades K-12 revealed several major areas of concern:

- There is insufficient emphasis on the ethical and responsible use of computers
- Computer/technology skills should not be taught in isolation; but integrated in all areas of the curriculum
- Instruction of computer skills should not be limited to specific grade levels or content areas
- Students need earlier exposure to a variety of technologies and software applications

In response to input, a set of standards were drafted that address the concerns of educational technology stakeholders as well as reflect a consensus of identification of technology skills and competencies that students in grades K-12 should exhibit. The proposed standards cover foundation technology skills and competencies for students that include:

- Basic Operations and Concepts
- Social and Ethical Issues
- Technology Productivity Tools
- Technology Communication Tools
- Technology Research Tools
- Technology Problem-Solving and Decision-Making Tools

Since the introduction of the current Computer/Technology Standards in 1995 and 2000, the use of technology in schools and classrooms has increased in the use of newer, more advanced technologies has become commonplace. The proposed standards are organized into four grade ranges: K-2, 3-5, 6-8, and 9-12. This provides greater opportunity for students to develop, reinforce, and amplify their skills.

Following the March 23, 2005, Board of Education meeting, a superintendent’s memo was distributed. The proposed standards were included in the memo along with information announcing the public hearing on May 25, 2005. An email address was also provided to receive comments. Information regarding the proposed standards and the public hearing was communicated to various stakeholder groups and organizations.

Superintendent’s Recommendation:
The Superintendent of Public Instruction recommends that the Board of Education adopt the Computer/Technology Standards for Grades K-12.
**Impact on Resources:**
The impact on resources is not expected to be significant.

**Timetable for Further Review/Action:**
Upon adoption by the board, the Department of Education will distribute the Computer/Technology Standards for Learning for Grades K-12 to school divisions and implement procedures for providing technical assistance and resources as part of the statewide system of support.
Proposed

Computer Technology Standards of Learning For Virginia’s Public Schools

June 22, 2005

Board of Education Commonwealth of Virginia
Proposed Computer/Technology Standards of Learning

Introduction

*Technology Literate*

...to possess technology skills that support learning, personal productivity, decision making, and daily life.

*Six-Year Educational Technology Plan for Virginia, 2003-2009*

The Computer/Technology Standards of Learning identify and define the progressive development of essential knowledge and skills necessary for students to access, evaluate, use and create information using technology. They provide a framework for technology literacy and demonstrate a progression from physical manipulation skills for the use of technology, to intellectual skills necessary for information use, to skills needed for working responsibly and productively within groups. Computer/technology proficiency is not an end in itself, but lays the foundation for continuous learning. The focus is on learning using technology rather than learning about technology.

To become technologically proficient, the student must develop the skills through integrated activities in all content areas K-12, rather than through one specific course. These skills should be introduced and refined collaboratively by all K-12 teachers as an integral part of the learning process. Teachers can use these standards as guidelines for planning technology-based activities in which students achieve success in learning, communication, and prepare them to meet the challenges of today’s technology-rich world of work.
Proposed Computer/Technology Standards of Learning

Grades K-2

Basic Operations and Concepts
C/T K-2.1 Students The student will demonstrate knowledge an understanding of the nature and operation of technology systems.
- Identify the computer as a machine that helps people at school, work, and play.
- Demonstrate Use technology to demonstrate the an ability to perform a variety of tasks; among them turning on and off a computer, starting and closing programs, saving work, creating folders, using pull-down menus, closing windows, dragging objects, and responding to commands.

C/T K-2.2 Students are The student will demonstrate proficient proficiency in the use of technology.
- Demonstrate the use of mouse, keyboard, printer, multimedia devices, and earphones.
- Use multimedia resources such as interactive books and software with graphical interfaces.

Social, and Ethical, and Human-Issues
C/T K-2.3 Students The student will practice responsible use of technology systems, information, and software.
- Know the school’s rules for using computers.
- Understand the importance of not sharing protecting personal information or passwords, with others.
- Understand the basic principles of the ownership of ideas.

C/T K-2.4 Students develop positive attitudes towards technology. The student will use technology responsibly.
- Demonstrate respect for the rights of others while using computers.
- Understand the responsible use of equipment and resources.

Technology Research Tools
C/T K-2.5 Students The student will use technology to locate, evaluate, and collect information from a variety of sources.
- Identify information in various formats.
- Identify available sources of information.
Problem-solving and Decision-making Tools
C/T K-2.6 Students The student will use technology resources for solving problems and making informed decisions.
- Recognize that technology can be used to solve problems and make informed decisions.
- Identify and select technologies to address problems.

Technology Communication Tools
C/T K-2.7 Students The student will use a variety of media and formats to communicate information and ideas effectively to multiple audiences.
- Identify the best tool to communicate information.
- Use technology tools for individual writing, communication, and publishing activities.
- Demonstrate the ability to create, save, retrieve, and print document.
Grades 3-5

**Basic Operations and Concepts**

C/T 3-5.1 **Students** The student will demonstrate knowledge and understanding of the nature and operation of technology systems.
- Discuss common uses of computers in their daily life and the advantages and disadvantages those uses provide.
- Communicate about basic technology components with appropriate terminology.

C/T 3-5.2 **Students** The student will demonstrate proficient proficiency in the use of technology.
- Use skills and procedures needed to operate various technologies such as scanners, digital cameras and hand-held computers.
- Identify basic software applications such as word processing, databases, and spreadsheets.

**Social, and Ethical, and Human Issues**

C/T 3-5.3 **Students** The student will understand and demonstrate knowledge of the ethical, cultural, and societal issues related to technology.
- Identify how technology has changed society in areas such as communications, transportation, and the economy.
- Discuss ethical behaviors when using information and technology.

C/T 3-5.4 **Students** The student will practice responsible use of technology systems, information, and software.
- Understand the need for the school division’s acceptable use policy.
- Discuss the rationale of fair use and copyright regulations.
- Follow rules for personal safety when using the Internet.

C/T 3-5.5 **Students** The student will develop positive attitudes towards technology uses demonstrate knowledge of technologies that support lifelong learning, collaboration, personal pursuits, and productivity.
- Work collaboratively when using technology.
- Practice and communicate respect for people, equipment, and resources.
- Understand how technology expands opportunities for learning.

**Technology Research Tools**

C/T 3-5.6 **Students** The student will use technology to locate, evaluate, and collect information from a variety of sources.
- Collect information from a variety of sources.
- Evaluate the accuracy of electronic information sources.
- Enter data into databases and spreadsheets.
Proposed Computer/Technology Standards of Learning

**Problem-solving and Decision-making Tools**
C/T 3-5.7 Students The student will use technology resources for solving problems and making informed decisions.
- Determine when technology tools are appropriate to solve a problem and make a decision.
- Select resources to solve problems and make informed decisions.

**Technology Communication Tools**
C/T 3-5.8 Students The student will use a variety of media and formats to communicate information and ideas effectively to multiple audiences.
- Produce documents demonstrating the ability to edit, reformat, and integrate various software tools.
- Use technology tools for individual and collaborative writing, communication, and publishing activities.
- Use telecommunication tools to communicate and share information with others.
Proposed Computer/Technology Standards of Learning

Grades 6-8

Basic Operations and Concepts
C/T 6-8.1 Students The student will demonstrate an understanding knowledge of the nature and operation of technology systems.
- Describe how technology impacts learning.
- Explore how software and hardware are developed to respond to the changing needs of technology.
- Describe compatibility issues, between various types of technology.

C/T 6-8.2 Students The student will demonstrate are proficient proficiency in the use of technology.
- Understand that hardware and software have different operating systems that may affect their use.
- Use self-help features such as online tutorials and manuals to learn to use hardware and software.

Social, and Ethical, and Human Issues
C/T 6-8.3 Students The student will understand the demonstrate knowledge of the ethical, cultural, and societal issues related to technology.
- Demonstrate knowledge of current changes in information technologies.
- Explain the need for laws and policies to govern technology.
- Explore career opportunities in technology related careers.

C/T 6-8.4 Students The student will practice responsible use of technology systems, information, and software.
- Demonstrate the correct use of fair use and copyright regulations.
- Demonstrate compliance with the school division’s Acceptable Use Policy and other legal guidelines.

C/T 6-8.5 Students The student will develop positive attitudes towards demonstrate knowledge of technology uses technologies that support lifelong learning, collaboration, personal pursuits, and productivity.
- Work collaboratively and/or independently when using technology.
- Practice preventative maintenance of equipment, resources, and facilities.
- Explore the potential of the Internet as a means of personal learning and the respectful exchange of ideas and products.
Technology Research Tools

C/T 6-8.6 Students The student will use technology to locate, evaluate, and collect information from a variety of sources.
- Use databases and spreadsheets to evaluate information.
- Use technology resources such as calculators and data collection probes for gathering information.
- Use Internet and other electronic resources to locate information in real time.

C/T 6-8.7 Students The student will evaluate and select new information resources and technological innovations based on the appropriateness for specific tasks.
- Use search strategies to retrieve information.
- Evaluate the accuracy, relevance, and appropriateness of electronic information sources.

Problem-solving and Decision-making Tools

C/T 6-8.8 Students The student will use technology resources for solving problems and making informed decisions.
- Employ technology in the development of strategies for solving problems.
- Use a variety of technologies to identify and provide possible solutions to real-world problems.
- Use content-specific tools, software, and simulations such as environmental probes, graphic calculators, exploratory environments, and web tools.
- Participate in collaborative problem-solving activities.
- Select and use appropriate tools and technology resources to accomplish a variety of tasks.

Technology Communication Tools

C/T 6-8.9 Students The student will use a variety of media and formats to communicate information and ideas effectively to multiple audiences.
- Choose the appropriate tool, format, and style to communicate information.
- Independently use technology tools to create and communicate for individual and/or collaborative projects.
- Produce documents demonstrating the ability to edit, reformat, and integrate various software tools.
Proposed Computer/Technology Standards of Learning

Grades 9-12

Basic Operations and Concepts
C/T 9-12.1 The student will demonstrate an understanding of the nature and operation of technology systems.
- Discuss the inherent advantages and limitations of technology.
- Define the relationship between infrastructure, electronic resources, and connectivity.
- Identify and describe the impact of new and emerging technologies and their applications.

C/T 9-12.2 The student will demonstrate proficiency in the use of technology.
- Identify and resolve hardware and software compatibility issues.
- Develop and communicate strategies for solving routine hardware and software problems.

Social, and Ethical, and Human Issues
C/T 9-12.3 The student will understand and demonstrate knowledge of the ethical, cultural, and societal issues related to technology.
- Assess the potential of information and technology to address personal, lifelong learning, and workplace needs.
- Demonstrate knowledge of electronic crimes such as viruses, pirating, and computer hacking.
- Explore and participate in online communities, and online learning opportunities.
- Identify the role that technology will play in future career opportunities.

C/T 9-12.4 The student will practice responsible use of technology systems, information, and software.
- Adhere to fair use and copyright guidelines.
- Adhere to the school division’s Acceptable Use Policy as well as other state and federal laws.
- Model respect for intellectual property.

C/T 9-12.5 The student will develop positive attitudes towards technology uses and demonstrate knowledge of technologies that support lifelong learning, collaboration, personal pursuits, and productivity.
- Respectfully collaborate with peers, experts, and others to contribute to an electronic community of learning.
- Model responsible use and respect for equipment, resources, and facilities.
Proposed Computer/Technology Standards of Learning

Technology Research Tools
C/T 9-12.6  Students The student will use technology to locate, evaluate, and collect information from a variety of sources.
- Integrate databases, spreadsheets, charts, and tables to create reports.
- Use available technological tools to expand and enhance understanding of ideas and concepts.

C/T 9-12.7  Students The student will evaluate and select new information resources and technological innovations based on the appropriateness for specific tasks.
- Analyze and draw conclusions about the comprehensiveness and bias of electronic information sources.
- Design and implement a variety of search strategies to retrieve electronic information.

Problem-solving and Decision-making Tools
C/T 9-12.8  Students The student will use technology resources for solving problems and making informed decisions.
- Investigate and apply expert systems, intelligent agents, and simulations in real-world situations.
- Select and apply technology tools for information analysis, problem-solving, and decision-making.
- Use technology resources such as educational software, simulations, and models for problem-solving, and independent learning.
- Produce and disseminate information through collaborative problem-solving activities.

Technology Communication Tools
C/T 9-12.9  Students The student will use a variety of media and formats to communicate information and ideas effectively to multiple audiences.
- Determine the most effective tool, format, and style to communicate to specific audiences.
- Use technology-based options, including distance and distributed education, to collaborate, research, publish, and communicate.
- Practice self-directed use of advanced technology tools for communicating with specific audiences.
